**SUPPLEMENTARY INFORMATION:**

**Title:** Aquaculture Surveys.

**OMB Control Number:** 0535-0150.

**Expiration Date:** April 30, 2020.

**Type of Request:** Intent to seek approval to revise and extend a currently approved information collection for a period of three years.

**Abstract:** The primary objective of the National Agricultural Statistics Service is to prepare and issue state and national estimates of crop and livestock production, prices, and disposition. The Aquaculture Surveys program produces estimates at

the national level on both trout and catfish. Survey results are used by government agencies and others in planning farm programs.

The trout survey includes inventory counts, sales (dollars, pounds, and quantities), percent of product sold by outlet at the point of first sale, number of fish raised for release into open waters, and losses. The catfish surveys include inventory counts, water surface acreage used for production, sales (dollars, pounds, and quantities), and losses.

- Twenty-five states (Arkansas, California, Colorado, Connecticut, Georgia, Idaho, Massachusetts, Michigan, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Oregon, Pennsylvania, Tennessee, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming) are in the Trout Production Survey.

In January, data are collected in the selected states that produce and either sell or distribute trout. State, federal, tribal, and other facilities where trout are raised for conservation, restoration, or recreational purposes are included in the survey.

- Nine states (Alabama, Arkansas, California, Georgia, Louisiana, Mississippi, Missouri, North Carolina, and Texas) are in the Catfish Production Survey. Data are collected from farmers in January for inventory, water surface acreage, and previous year sales. In addition, farmers in the three major catfish producing states are surveyed in July for mid-year inventory and water surface acreage.

- The survey conducted in Hawaii is conducted under a cooperative agreement with the state.
- Under the previous approval NASS also conducted surveys in Florida and Pennsylvania under cooperative agreements. Both of these surveys have been discontinued.
- All of the surveys conducted under this approval will have a voluntary reporting statement on each questionnaire.

**Authority:** These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 Public Law 104-13 (44 U.S.C. 3501, et seq.) and Office of Management and Budget regulations at 5 CFR part 1320. NASS also complies with OMB Implementation Guidance, “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),” Federal Register, Vol. 72, No. 115, June 15, 2007, p. 33362.

**Estimate of Burden:** Public reporting burden for this collection of information is estimated to average 15 minutes per response. Pre-survey publicity or cover letters will also be included to encourage respondents to complete and return the surveys and to provide the respondents with information on how to complete the

surveys using the internet.

**Respondents:** Farms and aquaculture facilities.

**Estimated Number of Respondents:** Approximately 2,500 per year.

**Estimated Total Annual Burden on Respondents:** 750 hours.

**Comments:** Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods. All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, D.C., November 13, 2019.

Kevin L. Barnes,  
Associate Administrator.
